## Saf-T-Bar Series H Conductor Bar

The advanced "Series H" Saf-T-Bar system features integral insulated conductors to provide years of safe, economical, and trouble-free service. It is designed for compact, low-cost installation, and minimum maintenance.

Series H conductors are supplied in 20 foot lengths with factory installed insulating covers. Joint fittings and covers are ordered separately.

## Series H is ideal for:

- Heavy duty cranes and monorails
- Wet locations
- Port authority equipment
- Dusty and dirty environments
- Environments conducive to electrical tracking

## Current Capacities

Skin-tight insulation runs cooler, will not deform under clamp pressure. Standard insulation is $160^{\circ} \mathrm{F}\left(71^{\circ} \mathrm{C}\right)$. Alternative insulations are available
 maximum conductor wear; the stainless steel channel insert provides resistance to corrosion and electrical pitting.

## Atmospheric specifications

In wet atmospheres, the system should be mounted on insulated hangers with the conductor in the downturn position. In dirty and dusty atmospheres, mount the conductor in the downturn position. If the atmosphere is likely to cause electrical over-surface tracking, choose hanger clamps with spool insulators rather than the standard coated hanger clamp.

## Insulating hanger option

A plastic slide hanger is available as an alternative design.

## Insulating cover options

Prefix A Standard rigid vinyl for cranes and hoists
Suffix H Medium heat plastic to $260^{\circ} \mathrm{F}$ for cranes and hoists
Suffix FI High heat fiberglass to $375^{\circ} \mathrm{F}$ for cranes and hoists

HC500 500
HC750 750
HC1000 1000
HC1500 1500

## Material

All capacities: Aluminum with 304 Stainless Steel Contact Strip

Other available features

- Contact shoe with flat surface of sintered copper and graphite, self-lubricating to effective draw current to the collector. Heat sink collector heads available for high current draw.
- Compact mounting of conductor in vertical or horizontal position without special parts or fittings.
- Collectors are available in either single or dual arm construction. Single (L, LL), and pantograph dual-arm constructions ( $\mathrm{D}, \mathrm{DD}$ ) are available.

## Saf-T-Bar Series H Conductor Bar Characteristics

Series H Conductor Bars are constructed of extruded aluminum with a stainless steel " $U$ " shaped contact surface which guides collector shoe movement and minimizes collector shoe wear.

Bars are provided in four sizes: 500, 750, 1000, or 1500 Amp, each with "Standard Heat" rigid PVC insulation, "Medium Heat" Lexan, or "High Heat" fiberglass insulations are available by request. The standard rail length is 20 feet ( 6.10 m )

| Bar Type: | HC500 | HC750 | HC1000 | HC1500 |
| :---: | :---: | :---: | :---: | :---: |

## Saf-T-Bar Series H Components

Splice Joints

HA750J

HA1000J
HA1500J
HA500J

## Powerfeed

## End Cap

## Isolation Joints

The bolted Splice Joint assembly is comprised of two stacked spring plates located inside the hollow portion of the conductor.

| Used on Bar: | Part No. <br> Std Heat | Part No. <br> Med Heat | Wt (kg) |
| :--- | :--- | :--- | :--- |
| HC500 | HA500J | HA500HHJ | $1.0(0.45)$ |
| HC750 | HA750J | HA750HHJ | $1.5(0.48)$ |
| HC1000 | HA1000J | HA1000HHJ | $2.0(0.91)$ |
| HC1500 | HA1500J | HA1500HHJ | $3.0(1.36)$ |

The Powerfeed supplies power to the bar and is inserted in place of the bar splice joint. Or it can be mounted at any point along the conductor by cutting the bar and insulating cover.

| Used on Bar: | Terminals | Part No. <br> Std Heat | Part No. <br> Med Heat | Wt lb (kg) |
| :--- | :--- | :--- | :--- | :--- |
| HC500 | Two 350 MCM | HA500F | HA500HHF | $3.0(1.36)$ |
| HC750 | Two 350 MCM | HA750F | HA750HHF | $3.0(1.36)$ |
| HC1000 | Two 350 MCM | HA1000F | HA1000HHF | $3.0(1.36)$ |
| HC1500 | Three 350 MCM-2 | HA1500F | HA1500HHF | $6.0(2.72)$ |

End caps are to be driven onto the exposed ends of the conductors to completely insulate the bar. Cap is $4^{\prime \prime}(102 \mathrm{~mm})$ long.

| Used on Bar: | Part No. | Wt lb $(\mathrm{kg})$ |
| :--- | :--- | :--- |
| HC500 | HA500N | $0.50(0.23)$ |
| HC750 | HA750N | $0.50(0.23)$ |
| HC1000 | HA1000N | $0.50(0.23)$ |
| HC1500 | HA1500N | $0.75(0.34)$ |

Isolation joints are required for circuit segmentation and are comprised of an insulating angle with attachment hardware to secure and space the adjacent rails.

| Used on Bar: | Part No. | Wt lb $(\mathrm{kg})$ |
| :--- | :--- | :--- |
| HC500 | HA1000IS | $2.0(0.91)$ |
| HC750 | HA1000IS | $2.0(0.91)$ |
| HC1000 | HA1000IS | $2.0(0.91)$ |
| HC1500 | HA1000IS | $2.0(0.91)$ |

## Saf-T-Bar Series H Components

Hanger Clamps and Anchors

HA1000K/KA

Hanger clamp bracket should be attached to the runway beam by welding or bolting. Conductors should be spaced $5^{\prime \prime}(127 \mathrm{~mm})$ inches apart, however, a minimum of $3.5^{\prime \prime}(89 \mathrm{~mm})$ is acceptable. Hanger clamp brackets require 9/16" (14.3 mm) holes for 1/2" hanger clamp bolts.

To properly support the conductor and to keep standard rail overhang to 24 " ( 610 mm ), space the first two brackets on $6^{\prime}(1.83 \mathrm{~m})$ centers and all other brackets on 10' ( 3.05 m ) centers.

The "Anchor" is a non-sliding version of the hanger which provides a solid fixing point on the conductor bar. Anchor clamp kit consists of an insulated keeper straddling each side of the standard hanger. The usual hanger bolt is replaced by a cup-point set screw that is tightened against the keeper plate at the desired anchor location. On HA1000H hangers, the set screw becomes the mounting bolt. ON HA1000K hangers, the set screw is threaded into the base of the insulator spool. HA1000PA anchors come with a drilled hole in the vertical stiffener. At the installation site, a hole is drilled through the conductor bar to accommodate a threaded rod. Threaded rod is captured by acorn nuts on both sides of the clamp.

| Hanger Clamp Type ${ }^{2}$ | Usage | Part No. ${ }^{1}$ | Wt lb (kg) |
| :--- | :--- | :--- | :--- |
| Hanger, coated steel | Normal atmospheres | HA1000H | $0.5(0.23)$ |
| Hanger, coated steel with insulator spool | Wet atmospheres | HA1000K | $1.0(0.45)$ |
| Hanger, Plastic | In lieu of: <br> HA1000H or HA1000K | HA1000P | $0.5(0.23)$ |
| Anchor, coated steel with anchor clamp kit | Normal atmospheres | HA1000HA | $0.6(0.27)$ |
| Anchor, coated steel with insulator spool and <br> anchor clamp kit | Wet atmospheres | HA1000KA | $1.1(0.50)$ |
| Anchor, plastic with anchor clamp kit |  | HA1000PA | $0.6(0.27)$ |

${ }^{1}$ Suffix "A" indicates anchor options
${ }^{2}$ All H Series components are available with stainless steel hardware, designated by the suffix "SS"

Hanger Clamp Mounting

## Saf-T-Bar Series H Expansion Gaps

Expansion Gap assemblies are pre-assembled and ready to be installed between two adjacent sections of rail to compensate for thermal expansion of the rail due to environmental changes and power-generated heat. Each end of the expansion section is attached to its mating rail with a powerfeed type of rail splice.

Aluminum conductors will expand one inch in 70 feet per $100^{\circ} \mathrm{F}$ temperature variation. The Expansion Gap will handle expansions of up to 8". The Expansion Gap assembly is $12^{\prime \prime}$ long "closed" and 20" long expanded (with the maximum gap of 8".) The gap is normally set at 4" in an average $60^{\circ} \mathrm{F}$ environment. An Expansion Gap assembly is required for every 500 feet (or fraction thereof) in system length to handle a 100 degree F maximum temperature variation. A proportional decrease in the 500 foot interval is required for greater temperature variations.

Center point of all conductor runs using expansion gaps requires an anchor clamp kit to locate rail settings.

| For Bar | Powerfeeds <br> included | Jumpers included | Part No. | Wt lb (kg) |
| :--- | :--- | :--- | :--- | :--- |
| HC500 | HA500F | $\# 3 / 0 \times 40^{\prime \prime}$ | HA500XG-8" | $13.0(5.90)$ |
| HC750 | HA750F | Two \# 3/0 $\times 50$ " | HA750XG-8" | $13.0(5.90)$ |
| HC1000 | HA1000F | Two \# 3/0 $\times 50$ " | HA1000XG-8" | $15.0(6.80)$ |
| HC1500 | HA1500F | Two 350 MC $\times 50$ " | HA1500XG-8" | $20.0(9.07)$ |

## Saf-T-Bar Series H Collectors

Standard L

For collector movement of 2 " in direction of contact and $\pm 1$ " lateral drift.

| Description | Intermittent Only | Continuous or Intermittent | Part No. |
| :--- | :--- | :--- | :--- |
| Single arm | 300A | 200A | HA300LS |
